

应用概述

弹簧测试系统主要用于生产测试、质量检测及产品设计方面。在这个自动化的弹簧测试系统中，在和被测弹簧同心轴上安装一个 S 型测力传感器（LSB 系列），精准地测量弹簧 Z 轴向所受到的力。

使用产品

LSB 系列力传感器 配置后续模块（USB220）。

测力传感器

**使用说明**

1. During R&D, the automated spring testing system can be configured to either compress or extend the spring under test.
2. FUTEK's LSB Series load cell is fixed onto the spring test column to measure spring compressive or tensile force when spring is compressed or elongated.
3. These force measures can be streamed to a computer for analysis utilizing FUTEK's USB Solutions.
4. Information can then be used to determine or verify stiffness of spring via Hooke's Law.
